

RESINC COMMUNITY PARTNERSHIP PROGRAM

Helping Communities Save More,
Do More, and Power a Brighter Future

Helping Communities Save More, Do More, and Power a Brighter Future

At RESINC SOLAR & BATTERIES, we're not just about installing solar—we're about making a difference. That's why we created the **RESINC Community Partnership Program**, designed to help Australian community organisations access solar infrastructure with minimal to no upfront costs.

This initiative supports local groups in reducing energy bills, cutting carbon emissions, and reinvesting valuable savings back into vital community programs.

Whether you're running a surf club, sports team, neighbourhood centre, or volunteer-led facility, our goal is to make solar accessible, affordable, and impactful—because your work powers Australia, and we want to power yours

What Is the Community Partnership Program?

The Community Partnership Program is a community-focused initiative that helps eligible organisations access solar and battery systems through in-kind contributions. In many cases, this means organisations can install a complete solar system without spending a cent of their own funds.

Parklands Community Preschool

Metropolitan Caloundra Surf Life Saving Club

Central Copast Surf Life Saving Head Office

PROGRAM PURPOSE

To support community organisations in installing high-quality solar systems at little to no cost, reducing both operating expenses and environmental impact.

Instead of wasting funds raised each year on power bills, you can focus your energy and resources on doing what you do best – supporting the community.

Through its social enterprise efforts, RESINC Solar & Batteries created the Community Partnership Program as part of our commitment to giving back to the community. This initiative supports eligible organisations by providing in-kind contributions—covering up to 100% of the value required to install solar and battery systems—helping reduce costs while delivering long-term energy savings.

We work closely with each organisation to:

- Design a solar system tailored to your energy usage and goals
- Guide you through applying for grants—such as the Gambling Community Benefit Fund (GCBF)
- Fundings with a **RESINC** in-kind donation

The result: a high-performance solar system at zero cost to your organisation.

Proven Impact Across Australia

Our social enterprise model has already helped over 20 Surf Life Saving Clubs install more than \$1 million worth of solar systems, delivering over \$250,000 in collective annual savings on power bills.

These clubs now reinvest their savings into:

- Life-saving equipment
- Community programs
- Frontline services

Why Choose RESINC Solar & Batteries?

- ✓ Matched funding up to 100% of the net value
- ✓ Referral program with every system installed
- ✓ Assistance with identifying and applying for suitable grants
- ✓ Tailored solar system design at no cost
- ✓ High-quality systems from Australia's most trusted brands
- ✓ Ongoing performance support and system monitoring
- ✓ Fully accredited, licensed electricians and solar professionals
- ✓ Transparent, values-driven service from a national award-winning team

We understand the challenges community organisations face with rising energy bills and operational costs. Our mission is to help reduce those burdens—so you can focus on the work that matters most.

How the Process Works

Initial Contact

Reach out to our team to express your interest.

Site Assessment

Send us two recent power bills and a few photos of your site (roof and switchboard).

System Proposal

Our engineers design a tailored solar system for your facility.

Grant Application Support

We help you apply for a relevant funding program.

Matched Support from RESINC

If approved, RESINC may provide an equal or greater in-kind contribution to complement the external funding received.

Installation & Ongoing Support

Our accredited team installs your system and continues to support it for years to come.

Let's Power More Good —Together

We have funding set aside to support up to 20 community organisations through the **Community Partnership Program** over the next 12 months.

If your organisation hasn't made the switch to solar—or you're looking for funding support to make it happen—**now is the time.**

Reach out to **RESINC SOLAR & BATTERIES** and discover how we can help your organisation save on energy and reinvest into your mission.

Let's create a future powered by purpose.

Client Testimonials

Client Testimonial

Young Animal Protection Society (YAPS)

"Installing solar with RESINC SOLAR & BATTERIES has been a game-changer for us. Not only are we reducing our power bills, but we're also doing the right thing for the environment. Every dollar we save goes back into caring for the animals. The commercial team was professional, supportive, and truly understood our values. I can not recommend the commercial team at RESINC SOLAR & BATTERIES enough"

Margaret Cochrane — Young Animal Protection Society (YAPS)

Client Testimonials

Client Testimonial

Fishers of Men

"A big thank you to Bruce, Andrea, and Leigh at RESINC Solar & Batteries!

We are immensely grateful for the fantastic solar system and battery setup. This will make a tremendous difference to Fishers of Men—helping us financially by eliminating huge electricity bills.

The customer service and support throughout the entire process were absolutely amazing and flawless. I wholeheartedly recommend Bruce and Andrea. If you're part of a not-for-profit organisation and looking for exceptional support with solar or battery solutions, reach out to Bruce and Andrea at RESINC Solar & Batteries."

Branwen Mearns – Fishers of Men Representative

Client Testimonial

Parklands Community Preschool & Children's Centre Inc

"We're incredibly proud to be taking this step forward as a preschool. Not only are we saving thousands each year, but we're also using this as a way to educate our children on the importance of clean energy and sustainability. The commercial team at RESINC SOLAR & BATTERIES made the process seamless from start to finish. I highly recommend contacting the commercial team if you are looking at installing solar."

Erin Wise — Parkland Preschool Director

Client Testimonials

Client Testimonial Bellambi SLSC

"Bellambi Surf Life Saving Club highly recommends RESINC SOLAR & BATTERIES to anyone considering solar. Please feel free to contact the Surf Club to inquire about the system and see how it's performing."

Craig Kershaw, President – Bellambi SLSC

Client Testimonial Metropolitan Caloundra SLSC

"This project is a game-changer for us at the Caloundra Surf Club. The savings allow us to invest in what matters most—saving lives and strengthening our community."

Ashley "Tugboat" Robinson, CEO – Metropolitan Caloundra SLSC

Client Testimonials

Client Testimonial

Central Coast Veterans Centre

"We are tremendously grateful for the kind generosity and support we have received from RESINC Solar & Batteries. We thank Bruce and Leigh for kindly donating the 6.2 kW solar system for our Central Coast Veterans Centre. Now we are reducing our power bills and doing the right thing by the environment. We are also ultimately able to take the savings from electricity and put that back into supporting veterans in our local community. The commercial team was professional, supportive, and truly understood our mission. I cannot recommend the team at RESINC enough. We are extremely humbled by this donation and the support that we have received."

POC Ian Collier — Central Coast Veterans Centre

Client Testimonial

Veteran — Summer Point, NSW

"When Scott from the RSL NSW Doyalson/Wyee sub-branch told me I'd been referred to RESINC's Solar & Batteries for Veterans program, I didn't know what to expect. Then Bruce Manning called to confirm that I'd been selected to receive a donated solar system — I was completely overwhelmed. I never expected a phone call like the one I received. I was completely lost for words. It's rare to be on the receiving end of such kindness. The RESINC team installed a brand-new 6.2 kW system. They were respectful, efficient, and genuinely proud to be part of something that gives back. I was deeply touched — not just by the donation, but by the care and personal attention. I want to thank Bruce, Leigh, and the entire RESINC team for honouring veterans not just in words, but in action. They have given me something truly valuable — not just energy savings, but a renewed sense of being seen, appreciated, and supported."

Rhonda Whiteman — Summer Point, NSW

OTHER CHARITIES WE WHOLEHEARTEDLY CONTINUE TO SUPPORT

At RESINC Solar & Batteries, we proudly collaborate with a network of Australian and International organisations.

The Alight Project

Through these partnerships, we help upcycle decommissioned solar panels and deliver them to communities in need across Africa. This initiative not only diverts waste from landfill but also brings clean, reliable energy to regions that need it most—empowering families, supporting education, and improving quality of life through sustainable solutions.

We believe every solar panel has the potential to make a difference, long after its initial installation.

Micro Solar solutions

Micro Solar solutions proudly partners with leaders in developing nations to deliver Micro Solar solutions—empowering remote villages that have never had access to electricity.

We're also working closely with Indigenous Australian Mayors and Elders to bring reliable and affordable solar energy to their communities. These initiatives help reduce energy inequality and create lasting social and environmental benefits.

From local communities to global villages, we're committed to extending the impact of clean energy where it's needed most.

Bali Animal Welfare Association (BAWA)

Our dedicated team on the ground in Indonesia works closely with local groups to support the welfare of Bali's street dogs.

From providing food and medical care to assisting with rescue and rehoming efforts, we're proud to play a part in giving these animals a second chance at life.

Supporting animal welfare is just one more way RESINC Solar & Batteries contributes to a more compassionate and sustainable world.

John Fawcett Foundation

We're proud to support the incredible work of the John Fawcett Foundation, a not-for-profit organisation focused on restoring eyesight to those in need across Indonesia.

Through this partnership, we help provide access to free eye surgery, medical treatment, and vision care—transforming lives and offering hope to individuals and families who otherwise couldn't afford these critical services.

Restoring sight restores opportunity, and we're honoured to contribute to such meaningful, life-changing work.

Gindaja Treatment & Healing Indigenous Corporation

Gindaja Treatment and Healing Indigenous Corporation, based in Yarrabah, Queensland, partnered with RESINC Solar & Batteries to reduce energy costs and promote environmental sustainability.

As part of our ongoing commitment to supporting Indigenous communities, RESINC Solar & Batteries proudly donated a 39.6kW solar power system—completely free of charge. The system has delivered substantial energy savings and a strong return on investment for the organisation, allowing more funding to go directly into treatment and healing services.

In addition to this installation, RESINC Solar & Batteries will soon be donating a second solar system to another Indigenous rehabilitation clinic in Yarrabah—again, at no cost—continuing our mission to empower communities through clean, reliable energy.
